THE ORGANIZATION OF THE NEXT HOUSE

Notwithstanding the Democracy have a majority of four or five members in the next House it is admitted that the organization will be adverse to the interests of that party, and an additional feather in the cap of the Administration. It is a good omen in the history of politics. If we are to carry out the broad and liberal principles of the Constitution, and continue the grand system of self-government so auspiciously begun on this continent, we must desist and abandon the narrow and bitter partisanship which has characterized our politics of late years. Let us have peace, good will, and a patriotic devotion to the interests and prosperity of the whole country

It is now definitely settled that an extra session will convene the last of May or the 1st of June. There is great anxiety to see the roll of members prepared by Clerk Adams. He declines to make it public, but asserts that after conceding the Republican all they claim, the Democrats will have three or four majority. The organization of the next House is likely to be exciting. There is much speculation as to whether enough Democrats will join the Administration to elect a Speaker, or whether Southern Republicans, who are greatly offended by Hayes' Southern policy, will secede from the party.

THE BONANZAS - The bullion shipped from the bonanzas on March accounts amounts to \$122,899 for Con Va and \$121,593 for California. The bullion receipts for the remainder of the fiscal month will show an increase over the amount thus far sent. There is now \$176,000 at the mills. By April 1st, it is expected the shipments will exceed those for February

THE PRESIDENT HAS NOT FOUND HIMSELF able to approve any of the plans which have been suggested to obviate the apparent necessities of an extra session. He, however, shares the general desire to discover some means by which the army can be sustained without calling a session. He will not finally decide the matter until after further consultation with members of the Cabinet.

DURING ten years only 73 of the mining companies whose stocks are known in the market have ever paid a dividend, and many of these only one or two small ones. The aggregate amount paid out as dividends by the 73 mines in ten years has been \$38,833,000

THE LONDON TIMES says the United States funds are now about the only legitimate object of investment in the foreign market. This shows that the credit of our Government stands second to that of no other nation in the markets of the world

THIS is the season in which the Los Angeles oranges are especially delicious, as they are fully ripe now. The orange in tropical countries, is ripe when it becomes yellow. In Los Angeles it is yellow fully two months before it is dead ripe.

IT is reported that J. W. Mackey, one of the bonanza firm, has purchased an elegant villa in the suburbs of Paris for 1,500,000 francs. Mr. Mackey is making arrangements for a European trip in May.

THERE is said to be a lower stage of water in the Carson at present than at any corresponding time for the past five years, and the wood driving fraternity are consequently despondent.

THE SUN says Grant's Long Branch cottage is being put in order, and is to be refurnished. It is said its use has been tendered to Hayes. A hotel keeper, too, has decided to offer Hayes a cottage

ONLY a portion of the proposed new issue of Phil Sheridan stock is to be sold for working capital, and remainder will be divided among stockholders.

THE COLUSA SUN states that mildew is attacking the wheat crop in Colusa county, and that paper is afraid that it may do great harm.

NEPOTISM.

President Grant was frequently censured, and not without cause, for the pains he took to provide all of his relations with good Government births. It is true that he bestowed such favors too lavishly, and his action displeased the people greatly. The other day President Hayes astonished the country by denying the application of a favorite cousin of his wife for a position under the Administration. The President told the young gentleman that he was honest and competent, but that an insuperable objection caused him to refuse to accede to his request. The offense was in being a relation. Grant was thus squarely slapped in the face. But now we notice that the President's son, Webb C. Hayes, is likely to go to Paris as Secretary of the Legation. If so the President will be in rather an awkward position. And yet we doubt not the people have no objection to a few of Mr. Hayes' relations serving them. They will not care to have all the family connections secured in that office, so that the same hue and cry raised against Grant can be as effectively employed to the detriment of the new man at the wheel, but a moderate use of the power of the President will not excite antagonism.

MR. W. L. WATTS HAS succeeded in his third attempt to cross the hitherto uncolonized mountain region in the southeast corner of Ireland known as the Vinnia Fokul, and an account of his journey has just appeared in England. Its chief scientific importance consists in the discovery that the great glaciers of the island are gradually increasing in size and invading the level country. The first snow covered volcanic rim of the Vinnia Fokul was traversed by Mr. Watts and his party of Irelanders with great difficulty. His ascent was forced to be sixty-one hundred and fifty feet. They emerged on the northern side, and here the appearance of the land was very different from that delineated in the well known Icelandic map of 1841. Great rivers were found to be diverted and blocked up by ice fields, and paths which were lately travelled over forty years ago now lie buried many feet beneath glaciers.

AT least one distinguished Arctic explorer looks hopefully to ballooning as a means of reaching the North Pole. Mr. John Payer, of the Austro-Hungarian expedition, writes to the *Athenaeum*: "Although we are not justified in asserting that the attainment of the Pole is impracticable, we may regard it as so, and exclude it from our Arctic explorations until, instead of employing the fragile vessel with which we navigate the seas, we are able to steer through the air to the hitherto unattainable city of our desires."

A WESTERN newspaper has the following notice: "All notices of marriage, where no bottle cake is sent, will be set up in small type, printed in an outlandish corner of the paper. Where a handsome piece of cake is sent, the notice will be put conspicuously in large letters; when gloves or other brilliant favors are added, a piece of illustrative poetry will be given in addition. When, however, the editor attends at the ceremony in person, and kisses the bride, it will have special notice—very large type and most appropriate poetry that can be begged, borrowed, or stolen.

GRAIN fields in Washoe Valley are beginning to put on an exceedingly verdant appearance. The farmers in that part of the country expect to be a power in the grain market next season.

BRITAIN.

SAN FRANCISCO, March 20.—John W. W. Johnston, of the firm of Crane & Johnston, attorneys was arrested about 2 o'clock this morning, on a charge of assault to murder upon his wife. The parties live at No. 23 Russ street, and about 2 o'clock this morning Johnston beat his wife terribly, and went back to the home three or four times afterward and tried to shoot her, but did not succeed. At last accounts the woman was alive, though it was not expected she could survive. No motive for committing the deed has as yet transpired.

FREIGHT TRAIN WRECKED.

KANSAS CITY, March 20.—An extra freight train on the Missouri and St. Joseph road broke through the approach to the Long Branch bridge near Cameron this morning. The locomotive and ten cars were wrecked. The engineer was killed and the fireman and a brakeman badly injured. The approach had burned during the night; it is supposed from sparks from a passing locomotive

CHICAGO, March 20.—A Washington special says the Cabinet meeting has decided to retain the troops in the South

TELEGRAPHIC MELANGE.

MOST IMPORTANT ITEMS IN YESTERDAY'S DISPATCHES.

A Major of Cavalry in Trouble.

ST. PAUL, March 20.—The trial of Major Reno of the Seventh cavalry, commanding Fort Abercrombie, which has been progressing before a court martial here, Colonel W. B. Hazen presiding officer, is drawing to a close. The details are not officially published, but it is known that Captain Bell of the Seventh cavalry, made charges of alleged infamous proposals to Mrs. Bell, and slanderous writings, etc., during Bell's absence. Bell's friends informed him of the facts known to them upon his return, and he demanded an apology. In army circles here the opinion seems general that Reno will be found guilty and his dismissal from the service recommended.

Cabinet in Session.

WASHINGTON, March 20.—All the members are present, and the affairs of South Carolina and Louisiana are under consideration. A number of papers bearing upon these cases are being examined. Little discussion is involved, and there is harmony of views with the President. It does not seem probable that these cases will be disposed of separately, but it is believed that upon the subject of withdrawing the troops from their present positions in New Orleans and Columbia, the same directions will be given. There is intense interest manifested to know the results of the consultation.

Trouble Brewing.

NEW YORK, March 20.—A *World* New Orleans special, dated at 11:30 last night says: "At this hour the excitement has its high, and all manner of rumors and statements are flying as to the intended rally of Packard's forces to night. There is positive information to the effect that Packard has hired a band of such desperadoes to storm the police stations. The leading Southern here are fitted with the people, and know nothing of such a move. In all the public buildings a double militia guard is now stationed, and any attack would be repulsed with terrible slaughter."

Fighting for a Million.

NEW YORK, March 20.—Joseph L. Lewis, of Hoboken, New Jersey, in a short time ago, aged 86 years, by bequeathing his entire estate, valued at a million dollars, to the Government to help pay the national debt. He was accounted a bachelor by everybody that knew him, and often declared that he had no relatives in the country or in England. Yesterday, however, a richly dressed woman appeared in the Senator's office, claiming to be his wife, and said that she was married to Lewis a year ago. Another woman claiming to be a niece, has filed a caveat for the million.

Ohio Democrats Demoralized.

NEW YORK, March 20.—A *Tribune* editorial, epitomizing the telegrams, says: "The vote which the Democrats of the Ohio Legislature will give for Senator well indicates the present death of opinions, leaders and purposes. All the efforts of Pendleton's friends failed to secure him a nomination. The Democratic vote otherwise will be cast blank. As for Uncle William Allen, he seems to be set down hard with his paltry four votes. It is doubtful if he will ever be seen to rise up again."

Matthews Nominatd.

COLUMBUS, Ohio, March 20.—Stanley Matthews was to day nominated by the Republicans for United States Senator. The Democrats made no nomination. The House proceeded to ballot, which resulted: Matthews, 64; Blank, 34. Alfred Gauthier, 6, Frank Hard, 1. In the Senate 20 Republicans voted for Matthews, and 13 Democrats for Blank. Both houses will meet in joint convention to-morrow to officially declare Matthews' election.

Diplomatic Changes.

NEW YORK, March 20.—A *Times* Washington correspondent thinks Christianity will get the Mexican mission, and Foster, the present Minister to Mexico, will go to Spain. It is also reported that George William Curtis has been offered the English Frelinghuysen is named for Berlin, and General Lew. Wallace will take Chile or Peru, if offered.

A Herald Washington special says it is not improbable that Fish will receive the English mission.

Arresting Packard's Extremes.

NEW ORLEANS, March 20.—Nichols' police are arresting Packard's recruiting officers. Several of them have been locked up, charged with trying to create a riot.

ARIZONA.

Its Mines, Wants, Etc.

[Correspondent S. F. Alta]

The late startling discoveries in Arizona are going to open to the country the richest belt of mineral deposits in the world. There have been but two drawbacks to the country—want of transportation and want of capital. It has been a well-known fact to all pioneers of that section that there were quartz ledges of fabulous richness there, but the scarcity of capital and transportation and the hostility of the Indians prevented their proper prospecting or development. There is not a range of mountains in the Territory—and it is the most mountainous formation in North America—that does not contain either gold or silver in paying quantities.

ENGLISH CAPITAL.

In the year 1869 a company of English capitalists came to the country and made arrangements for purchasing several very rich mines, among them the Santa Rita, nine miles from Tubac, and the Sierra Colorado, about fifteen miles southwest of Tubac, both in the extreme southeastern part of the Territory. The Santa Rita has some very rich placers.

OTHER MINES.

Another very rich mine, a few miles north of the Santa Rita, in the mountains bordering Sonora Valley, on the right, is the Patagonia; and only a few miles from this mine is the celebrated Mowry Mine, which has lain idle since and during the Rebellion, with the exception of being worked by a few strolling Mexicans who come up from the Mexican town of Santa Cruz, about twenty-five miles from the mine, and make very good wages out of the mine with the assistance of a "burro," notwithstanding the warning of trespass posted on the walls of the cabins by Sylvester Mowry. It is singular that a mine of its known richness, and the ready appliances of machinery, etc., should be allowed to remain idle and go to ruin.

"PLANCHITA DEL PLATA."

On "silver flatiron," is about 50 miles south of the old Mowry mine, and is 15 miles south of the old abandoned post or town of Calabasas, on the Sonora road. This location was the scene of great excitement about two years ago—the present owners of the Silver King mine having started to open rich ledges. There are old stories current among the Mexicans and pioneers that the Padres once worked this mine with their stocks and found deposits of almost pure silver.

FRUITA MINE

The Franta was the only mine among the many in the southeastern part of the territory that did not pay, it is located about twenty miles west of the Planchita mine. The machinery was afterward removed to Apache Pass and placed in the gold mine at that point. All of these mines have abundant facilities in the shape of water and fuel, and the railroads will supply the great want of transportation.

IN ARIZONA AND SIERRA MULA MOUNTAINS.

List of the Patagonia and Mowry mines are these mountains, and all old pioneers know that they were very rich in gold and silver, and also placer deposits; but this is a section of the country that has always been very "bad" for Indians, and they have been an insurmountable drawback to the proper development of that part of the country—it being too far from a base of supplies to admit of thorough prospecting. These mountains border San Pedro River, the Mule mountains the north bank, and the Huachuca the south.

A party of three Americans owned a very rich placer claim on a creek emptying into the San Pedro, in this neighborhood, and took out an immense quantity of gold; but the peons they employed murdered them and carried away the gold to Santa Cruz. Mr. Thos. Gardner, an American ranchman, who lived near Santa Cruz at that time, interested himself with the authorities and endeavored to bring them to justice, but the laws of Sonora were too lax at that time to be of any use.

LATEST DISCOVERIES.

The latest and richest discoveries are right in the heart of the "civilized" part of the Territory, comparatively—being only 25 or 30 miles north of Florence—a flourishing town on the Gila River. The other mines mentioned are out of the way, in regard to present routes of travel, being one hundred miles or more further east, near the Sonora line.

CLIMATE.

Arizona has the most wonderful climate in the world, and when one becomes acclimated he never dies, but "dries up and blows away." Men who have settled there could not be induced to leave, as there is an abundance of wealthy men who have made enough to satisfy their earthly wants, and they stop. Some leave for a year or so, but always wind up in Arizona. It has a climate that is a "sure shot" on lung complaints. In fact, there is no sickness there, but a species of intermittent fever that wears off by acclimatization.

PORCUPINES were introduced into Florida by the Spanish before the sixteenth century, and from Florida to Virginia, from whence they were taken to England by Sir John Hawkins in 1565.

A new lot of imported cigars just received at E. Meyers' in J. E. Jones & Co.'s old bank.

FROM JOHN JOHNSON PRINTING CALL

FROM JOHN JOHNSON PRINTING CALL

NEWSPAPERARCHIVE®

NEWSPAPERARCHIVE®

In a recent lecture delivered in Elkhorn on "The Stars," Professor Grant gave a graphic idea of the immensity of space. He said that a railway train running at the rate of fifty miles an hour would reach the moon in six months, the sun in two hundred years, and Alpha Centauri, the nearest of the fixed stars, in forty millions of years. A ball from a gun, traveling at the rate of nine hundred miles an hour, would reach Alpha Centauri in 2,700,000 years; while light, traveling as it did at the rate of 185,000 miles in a second, would not reach it in three years. Light from some of the telescopic stars would take 5,760 years to reach the earth; and from some of the clusters the distance was so great that light would take half a million of years to pass the earth, so that we saw objects not as they really were, but as they were half a million years ago. These stars might have become extinct thousands of years ago, and yet their light might present itself to us. As to the magnitude of the stars, he noticed that it was computed that Alpha Lyra was one hundred billions of miles distant from the earth, and its magnitude and splendor were as 20 to 1 when compared with our sun. Similar investigations brought out the fact that our sun was neither vastly greater nor vastly less than the great majority of the stars.

A Romance of Life.

Some thirty odd years ago a young man and young girl in Sweden united their lives in matrimony and soon after migrated to America. Here four children were born to them and the father and mother were "gathered home." The children were provided homes, but the two boys were dissatisfied with their quarters and vanished between two days. This was the year before Sumter was fired upon. One had went to Minnesota and the other went South. When the war commenced each became a soldier, one in a Minnesota regiment, the other in the Confederate army. In one of the fierce battles that took place the two brothers met and recognized each other. The meeting was brief, but long enough for them to immediately pledge that when the war was over they would unite and not again separate. This they did and settled in East Des Moines, where both are now residents, and one of them is a candidate for office, to be elected or defeated next Monday. This sounds considerably like a blood and thunder novel in our column, but it's all true.
